

LumiSight Workplace is a self-screening and surveillance platform that makes it easy for individuals to provide a daily check-in of their health status and upload proof of vaccination before entering a work environment.

Features

- ✓ Easy-to-use web and mobile applications
- ✓ Push notifications and email messages
- ✓ Vaccination card registry and photo upload
- ✓ Contact tracing and quarantine check-in
- ✓ Visitor check-in options

Benefits

- ✓ Scalable platform with consolidated data
- ✓ Real-time monitoring, tracking, and reporting
- ✓ Streamlines business operations
- ✓ Integrates with identity management systems
- ✓ In-app help and support

Administration Dashboard

Administrators receive real-time information to identify risks and monitor activity.

- ✓ Configurable content and features based on your organization's processes and policies
- ✓ Real-time data to drive informed decisions
- ✓ Built-in security and access control
- ✓ Vaccination and testing approval features

LumiSight Workplace is a Software as a Service (SaaS) solution built on the LumiSight Platform, a pre-engineered, end-to-end Platform as a Service (PaaS) that leverages state-of-the-art AWS cloud infrastructure and services.
